

Week 11 Summary and learning

Team Leader: Aryan Langhanoja (92200133030)

Team member: Kirtan Makawana(92200133031) Team member: Dhruviben Patel (92200133029)

Team member: Malhar Shah (92200130016) Team member: Aryan Mahida (92200133011)

VIDEO-2 Picasso HD

This video showcases a comprehensive collection of Picasso's works offering insights into his artistic evolution and iconic pieces. It explores different phases of his career, such as his all works. The video aims to provide a visual overview of Picasso's artistic contributions and innovations across various mediums.

VIDEO-3 Picasso at work

Picasso uses a clear surface as his canvas, so viewers can see every stroke, line, and change he makes. He often starts with one idea and then changes it as he goes along, showing how fluid and experimental his art is.

The film lets us see Picasso's incredible skill and how he uses experimentation to shape each piece. Sometimes he paints over previous work to achieve a new look, which highlights his willingness to keep evolving and trying new things. The documentary shows that Picasso's art isn't just about talent but about his unique way of thinking and problem-solving.

This film is perfect for anyone who wants to see the artistry and freedom in Picasso's approach to making art, showing that creativity involves trying, changing, and experimenting along the way

VIDEO-4 Overview Six Thinking Hats

The Six Thinking Hats concept, as discussed in this video, offers a structured approach to thinking and decision-making, allowing individuals and groups to consider problems from multiple perspectives sequentially rather than all at once. Key learnings from the video include:

Structured Thinking Process: The Six Thinking Hats approach separates different types of thinking into distinct "hats" (modes), preventing the confusion that often arises from trying to address all aspects of a problem simultaneously.

Role of Each Hat:

- Blue Hat: Focuses on control and setting agendas; it's typically used by the facilitator.
- White Hat: Deals with facts and data, assessing what is known and what needs to be known.
- Black Hat: Judgment-oriented, used to identify potential risks and problems logically.
- Yellow Hat: Optimistic, focusing on benefits, feasibility, and positive aspects, considering both short- and long-term views.
- Green Hat: Creative, exploring alternatives, ideas, and possibilities without needing to be logical.
- Red Hat: Purely emotional, allowing expressions of feelings and intuition without justification.

Encourages Parallel Thinking: Instead of debating or arguing opposing views, everyone "wears" the same hat at the same time, promoting unity and clearer communication.

Improves Decision-Making: By focusing on one thinking mode at a time, Six Thinking Hats prevents circular debates, reduces unsatisfactory decisions, and enhances commitment and support for outcomes.

Effective for Group Innovation: The Six Thinking Hats method can complement other creative tools like brainstorming and mind mapping, making it useful for rapid idea exploration and decision-making.

Week 11 Summary and learning

Team Leader: Aryan Langhanoja (92200133030)

Team member: Kirtan Makawana(92200133031) Team member: Dhruviben Patel (92200133029)

Team member: Malhar Shah (92200130016) Team member: Aryan Mahida (92200133011)

This video emphasizes that the Six Thinking Hats is a flexible "operating system" that can improve both personal and team thinking processes by fostering structured, empathetic, and thorough exploration of ideas and decisions.
